cam ve çeliğin sıra dışı buluşması

AR1011  
Ti-Nitride coating

## ürün özellikleri

Sıvaüstü montaja uygun kat kumanda ve gösterge paneli  
AISI304 kalite paslanmaz çelik gövde. AISI430 montaj sacı  
Çizilmeye ve kimyasallara dirençli PMMA gösterge camı  
Grafik LCD, dot matrix ve 7 segment LED göstergelere uyumlu

## Product features

Surface mounted landing operation panel  
AISI304 stainless steel body. AISI430 mounting plate  
Chemical and impact resistant CNC machined lenses  
Suitable for Graphics LCD, Dotmatrix, multicolor segment indicators

## Product features

Programmable LED Dotmatrix indicators for car and landing operator panels  
Up to 30mm, 10x7 high intensity LED modules  
Very efficient (>%78) power supply design  
Binary, gray, 7segmented, 1wpf, DO1 and counter decoding possibilities

## ürün özellikleri

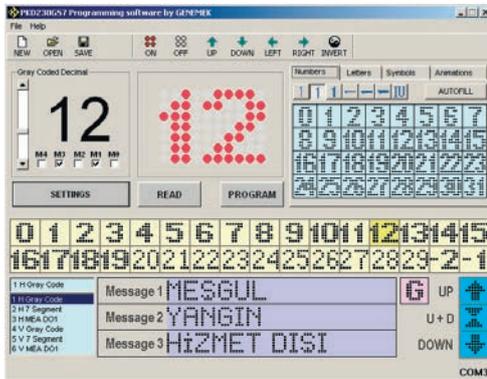

Programlanabilir nokta matris LED kat ve kabin göstergesi  
30mm ye kadar, 10x7 yüksek parlaklıklı LEDler  
Çok yüksek verimlilikte (>%78) güç kaynağı tasarımı  
Binary, gray, 7segment, tek tel,sayıcı ve DO1 sistemleriyle çalışabilir

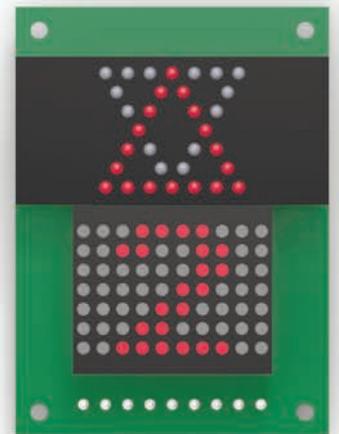

PKD230GS7  
switch mode power supply

PKD230AE  
suitable for COP applications

programming software for dotmatrix indicators

PKD230ATE  
suitable for LOP applications

# AXES

asansörünüzü kim kullanıyor?

AXES-D front view  
stainless steel  
red-green illuminated probe

AXES-D  
module can be programmed  
with on-board push buttons

## Nasıl çalışıyor?

- \* AXES, asansörünüzün kullanımını denetlemenize yarar
- \* Önceden kayıtlı bir anahtar yuvaya dokundurulduğunda röle kontakları beş saniye boyunca kapalı devre olur.
- \* Kayıtlı olmayan anahtarlar yuvaya değdirildiğinde sistem uyarı sesi ve kırmızı ışıkla sizi uyarır.
- \* Modül üzerindeki KAYIT butonuna basıp çekilerek, yeni anahtarlar sisteme kayıt edilebilir.
- \* 512 anahtara kadar hafızasında saklayabilir.

## How does it work?

- \* AXES is a simple system to restrict usage of elevators.
- \* Main module controls and stores previously programmed key informations.
- \* If a registered key touches on red illuminated probe, system beeps shortly, shortens its relay contact outputs for 5 seconds, blinks until the end of access period in green color.
- \* Undefined keys respond long beeps with flashing red light inside of probe.
- \* To define a key, click on REC button on the back side of main module and touch the key into the probe.
